MOBI-Crane

Voyager

Vacuhand Pro Crane™

The **Vacuhand Pro Crane™** is a hybrid version of our articulated jib crane. With this option, you receive:

- Vacuum pump and filter mounted on the vacuum pump platform.
- Option for a motor starter fuse and disconnect panel.
- Sound muffler included with vacuum pump.
- 2" vacuum supply hose festooned along MOBI-Arm™.
- Vacuhand V™ vacuum tube lifter is suspended at the end of MOBI-Arm™.

There are a wide range of interchangeable suction feet to choose from. Common suction feet are used for bags, boxes and sheet goods of varying sizes. The choice really depends on your application needs. Custom options are also available.

Multiple mounting options are available. If you want mobility, we can mount the crane onto a floorplate which can be moved around via pallet jack or forklift. The crane can also be installed in various other ways such as directly to the floor, to the wall, or to an existing column.
