DEKKA 100 SEMI-AUTOMATIC CASE SEALER

Perfect for light manufacturers operating a low-speed automated packaging line

The DEKKA 100 is a pressure sensitive, bottom belt, semi-automatic case sealer. It is designed to be the perfect pairing for the Dekka tape head, providing an economic and reliable case sealing solution.

The DEKKA 100 is able to handle a wide range of case sizes and can easily be changed to adapt different cases with a quick 2 point size change over. The machine is simple and easy to use with on machine infographic guides. The machine was designed with maintenance in mind with easy access to belt and tape head changes.

FEATURES AND BENEFITS

- Entry level case sealer is ideal for applications looking to upgrade from manual case sealing
- Compact machine footprint for applications with minimal floor space
- Reliable case sealing with the use of DEKKA E tape head
- Quick and easy size change with on machine pictorial guides and only 2 changeover points
- Deepest service support network across all of North America
