

LIFT-O-FLEX®*By***Roni****THOMAS CONVEYOR**
and Equipment Company, Inc.**Easy Operation Pneumatic Lift**

MechLight® is a pneumatic powered lightweight lifting mechanism that can be mated with a wide variety of end effectors. The MechLight® provides easy operation and effortless movement with or without a load. With easily adjusted controls, the MechLight® can be configured for load balancing and ease of movement.

The MechLight® shown demonstrates the use of an engine starter motor gripper attachment. The pneumatically powered gripper trips a switch when positioned correctly on the starter which actuates the arms, locking them in place. Dual button actuation ensures that an operator cannot accidentally release the load without depressing both buttons at the same time.
