VERTICAL PIVOT GATE FOR MEZZANINES

Wildeck's Vertical Pivot Gate offers an excellent solution for those pressed for horizontal clearance space. Specifically designed to operate on the vertical plane, this gate easily integrates with mezzanine/deck surfaces.

During use, the Vertical Pivot Gate is rotated into an upright position, allowing for the uninterrupted transfer of pallet loads. Following the load transfer, this lightweight and durable gate can be easily closed and securely locked.

Highlights

- Occupies minimal deck footprint
- Custom sizes available
- Designed in compliance with OSHA and CAL/OSHA requirements

Wildeck Vertical Pivot Gate (PV-4)

Model #	Gate Clear Opening Width	Horizontal Clearance	Gate Weight	Shipping Weight
PV-4	4 ft.	66"	27 lbs.	70 lbs.

PV-6	6 ft.	90"	37 lbs.	80 lbs.
PV-7	7 ft.	102"	42 lbs.	84 lbs.
PV-8	8 ft.	114"	47 lbs.	88 lbs.

STANDARD SPECIFICATIONS

- 1-1/2" Dia. Steel tube construction
- 3" x 3" Steel based mounted posts (6" x 6" base plate) with vertical cradle for gate to lock into
- Provides 42" guard rail protection with toe board
- Vertical clearance is equal to gate width
- Two (21" sphere test) or three (12" sphere test) rail options available
- Designation of left or right side opening needed (orientation direction is looking off deck to floor)
- Wildeck yellow paint finish for high visibility (other colors available)

EDGEALERT™ COMPATIBLE

Open gates at elevated mezzanine platforms present a serious safety hazard and can result in large fines during an OSHA inspection. Wildeck's EdgeAlert™ Open Gate Alarm signals an open gate condition with flashing LED lights and a highly audible alarm.
